

## **ZMM Canada Minerals Corp. Issued Mining Leases on Zeolite/Basalt Properties**

**July 21, 2022**

ZMM is extremely pleased to announce that, after three years, we have received mining leases on both the TransCanada (TC) (received in June 2022) and Juniper (received in July 2022) zeolite/basalt deposits from British Columbia's Ministry of Energy, Mines and Low Carbon Innovation!

The terms of the leases are 30 years. The TC lease is 184 hectares, the Juniper is 40 hectares. The TC deposit is 25km from Kamloops, BC and the Juniper is 30km from the TC deposit.

With this milestone achieved, ZMM can secure financing for operations. Obtaining these leases enables ZMM to proceed with development of the quarries and processing plant. The processing plant will be constructed on the TC property and Juniper ore will be trucked to the plant. The expansion of the quarries and plant construction is planned to commence in the fourth quarter of this year. ZMM operations will have a very low carbon footprint with no waste generated – all material processed will go into a product. ZMM now has the momentum to realize its goals and we look forward to a long, successful, sustainable operation.
